

# Puppy Class Recap

CLASS 3

## settle & play

This week, we asked the puppies to sit on their mats. We let them greet their dog friends briefly and asked them to come right back to us.

## training

We taught the puppies to **sit** and began teaching them that it is okay for us to **take** what they have in their mouths. We used our hand touch and varied rewards to teach the puppies to **come when called**.

## concepts

Luring is when we use something a puppy wants to follow to get them to move in a certain way. We use small steps when we stop using the lure.

Rewards make your puppy more likely to do the things you want. Things other than treats can reward your puppy!

## homework

Continue practicing being fun while doing recalls and leash walking! Fade the lure out from your sit.
